SUMMARY

Computer Science student at Hunter College with hands-on IT support experience: help desk tickets, hardware setup, and desktop troubleshooting. Resolved 95% of client support requests on first contact as an IT intern. Brings a software engineering background and a patient, customer-first approach to helping staff get back to work.

EDUCATION

Hunter College, City University of New York **New York, NY**
Bachelor of Science, Computer Science · Currently Enrolled Expected Graduation May, 2028

LaGuardia Community College **New York, NY**
Associates of Applied Science (AAS) - Programming and Software Development June, 2024
Relevant coursework: UNIX Network Operating Systems, Database Concepts, Systems Analysis & Design, Object-Oriented Programming

Pursuit (pursuit.org) **New York, NY**
iOS Development Fellow August, 2018 - July, 2019
Google-funded software engineering fellowship: Gained hands-on experience with Swift, Git, Data Structures, Algorithms, APIs, and tech principles and culture via team/individual projects, code reviews, and pair programming.

TECHNICAL SKILLS

- **IT Support:** help desk ticketing (Autotask), desktop and peripheral setup (monitors, docking stations, cabling), installs, moves and changes, system configuration, troubleshooting, remote and in-person user support
- **Software & Tools:** Windows 10/11, Microsoft 365, macOS, Git, GitHub, Jenkins
- **Programming:** Python, TypeScript/JavaScript, HTML/CSS, SQL (MySQL, PostgreSQL), Angular, Node.js, Swift
- **Cloud:** Firebase, Google Cloud Platform, Vercel
- **Languages:** English, Spanish (native)

IT SUPPORT EXPERIENCE

Power Consulting IT Services Company **New York, NY**
Information Technology Intern March, 2023 - June, 2023

- Resolved technical support tickets in Autotask, reaching 95% first-contact resolution for client users
- Installed and set up workstations, monitors, docking stations, peripherals and cabling for office deployments
- Updated and managed system configurations for client accounts, improving setup accuracy and reducing errors
- Troubleshot hardware and software issues directly with users; escalated complex problems to senior technicians

SOFTWARE ENGINEERING EXPERIENCE

Wells Fargo **New York, NY**
Software Engineering Apprenticeship July, 2023 - June, 2024

- Helped build and maintain a Single Order Entry application used by financial advisors to manage client holdings and orders
- Ran automated testing and code reviews that cut post-release bugs by 15%
- Supported application deployments through CI/CD pipelines (Jenkins)
- Worked day to day with cross-functional teams, following change and release processes

Developer (Contract) | [GitHub](#) **Remote**
Adam Holzrichter Charity Sale March, 2020 - July, 2020

- Built a responsive portfolio website (HTML, CSS, Bootstrap, jQuery) and configured its custom domain and hosting

PROJECTS & CERTIFICATIONS

Oxalate (oxalate.info) — Angular, TypeScript, Firebase

- Built and support a live web app that helps oxalate-sensitive users search and track foods, with secure sign-in (Firebase Authentication) and saved profiles

Immigrant Reunification ([GitHub](#)) — Swift, Firebase, Microsoft Cognitive Services

- Built a mobile app that helps separated immigrant and refugee families find each other by uploading photos and contact details, using Microsoft's image APIs to check for matches

Microsoft Certified - Azure Fundamentals, January 2024

Coursera - Python for Everyone, June 2020

CodePath - iOS Development, November 2019
